Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gould in view of Buchser '725. Gould discloses a refrigerator having an ice maker and an ice storage bin 68 mounted on the door 14 of the refrigerator. However, Gould does not disclose the bin 68 as having a bottom opening and an auger disposed within the bin. Buchser '725 teaches an ice storage bin 19 having an opening on the bottom thereof and an auger 20 disposed within the bin. It would be obvious to provide the ice storage bin of Gould with a bottom opening and an auger within the bin, in view of Buchser '725, for the purpose of providing a dispensing mechanism for the ice within the bin.

3. Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 10-25 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
